

Corporate Vision

Our Mission: " Innovative Technology Catalyst"

We strive at growth and continuity of the Company by successfully developing and providing our customers with leading, innovative and revolutionary software solutions, strategies and technical talents that enhances their performance and productivity, creates value and drives them closer to meeting their business objectives.

Our Vision:

Our Vision is to become a globally recognized and trusted software company providing the highest standard software solutions and become a leading player in the software services market.

Our approach to attain our Vision:

1. Complete understanding of client requirement.
2. Dedicated attention to client specifications.
3. Effective communications.
4. Access to the best professional personnel.
5. Deployment of the newest software development technologies.

Our Resource:It takes a winning combination of deep technical expertise and results-oriented technology to earn the trust of some of the world's biggest commercial and government organizations.At the heart of Tejas is a competent and knowledgeable staff of dedicated professionals. This dedication is consistent at every level of the organization. We are innovative and creative when searching for solutions. Tejas people are talented and each contributes to the total operation of the department. Team members encourage and mentor one another.

We recognize that the best technologies are only as good as the people who deliver and support them, and our staff of knowledgeable, experienced professionals is among the best in the industry. These highly skilled people introduce new technologies, perform installations, conduct training and other support services and will insure immediate - and personal - support. This concentration of technology experts is unsurpassed in the industry and provides us with a competitive advantage over other service providers.Tejas's programming staff invests thousands of man hours to write and maintain software to not only meet the growing needs of our customers, but to insure compliance and competitiveness.
